

Muhammad Ibrahim Mujahid

Mid-Level Front-End Developer

• PERSONAL INFORMATION	Date of Birth: December 1, 2000 (25 yrs old)	Marital Status: Married (Father of two)
	Military Status: Completed (Exemplary Conduct)	Location: Monshat Al-Qanater, Jizah, Egypt
• CONTACT	Phone: +20 1151547569	LinkedIn: linkedin.com/in/thismujahid
	Email: mohamed.mojahead@gmail.com	Portfolio: https://mejo.dev
• SUMMARY	Front-End Developer with 4+ years of professional experience, specializing in Vue.js, TypeScript, and Nuxt.js, with practical knowledge of React.js. Strongly focused on web performance and Core Web Vitals, consistently targeting 95%+ performance scores in realty and on PageSpeed Insights and WebPageTest. Also equipped with a solid theoretical understanding of API design, SQL/NoSQL databases, DSA, and core computer science fundamentals, reinforced through mini-projects and experimental applications to better understand front-end/back-end interaction.	
• EXPERIENCE	Front-End Developer @ Digitaleka GmbH Component Provider of Software Solutions 10/2021 – 03/2025 06/2026 – Present (Full-Time, Remotely) Responsible for building and maintaining production-ready web applications for clients across multiple industries, covering the full front-end lifecycle from UI implementation and API integration to testing and deployment: - Owned the front-end development lifecycle for multiple client web applications, from translating product requirements and UI designs into implementation to API integration, testing, deployment, and maintenance. - Architected and developed reusable Vue/Nuxt components and scalable application interfaces used across complex dashboards, customer-facing platforms, and multi-step business workflows. - Contributed to and delivered client-facing platforms such as Al-nassr.sa, Die Sprachbrücke, Strata Egypt, Oriento, and other production applications serving different industries and business models. - Integrated front-end applications with RESTful APIs and backend services, handling application state, validation, loading/error states, and complex data-driven user flows. - Improved performance, responsiveness, accessibility, and SEO, delivering optimized experiences across desktop and mobile devices.	
	Front-End Developer @ Tayar Electric Fleet-as-a-Service for Sustainable Delivery 01/2024 – 03/2025 (Part-Time, Remotely) I was responsible for developing and maintaining the company's web interfaces across multiple client projects at Tayar, a software house, covering customer-facing applications, dashboards, and administration panels using Vue.js and Nuxt.js. - Developed and maintained restaurant dashboards and super-admin panels using Vue 2. - Built QuickOrder, a multi-tenant SaaS product, from scratch using Vue 3 and Nuxt.js, including the restaurant interface, theming system, dashboard, and super-admin panel. - Worked on reusable front-end architecture and shared UI components across different products and client requirements. - Conducted technical interviews for front-end candidates and contributed to hiring a developer to work with me as a team with my leadership.	

- **CERTIFICATES**
